

## Swift Systems

In today's fast-paced business world, Internet access speed is vitally important! Especially so when companies are dependent upon e-mail and web access on a 24x7, 365 day cycle... and now more than ever time equals money.

Swift Systems, an award winning, technology-driven firm located in Frederick, Maryland, has just unveiled a new and exciting "Jetsons-like" broadband offering. Swift Systems' brand new ***Business-Class High Speed Wireless Internet Service*** is like no other. The program is packaged in bandwidth rates of 3 and 6 Mbps (megabits per second), with speeds of up to 100 Mbps also available. These packaged rates, which are not affected by weather or construction, are two-to-four times faster than T-1 lines at 30 - 50 percent lower costs!

Swift Systems is transmitting this new ***Business-Class High Speed Wireless Internet Service*** from several locations throughout Frederick, providing maximum broadband access. The source of the service, Swift Systems' fiber-based network backbone, has experienced **zero downtime** in the last three years plus! The network is delivered via a star topology, which means that a subscriber's service is undisturbed regardless of the number of other users online at the same time.

"Swift saved the day. When other providers couldn't make it work, they offered us a solution that not only increased our speed but saved us money too," said Richard A. O'Hara, Assistant General Manager of the Farmers Co-op Association. "Their technicians were very thorough, making sure everything was just as it should be. We appreciate the service, the price and the opportunity to deal with a local company that we can trust."

Swift Systems is offering a special introductory offer: subscribers will receive **free** installation, the first month's service **free** and **free** web and e-mail hosting. For a **free** quote, which is almost as fast as their wireless service, call David Sprankle at (301) 682-5100. Visit Swift online at [www.SwiftSystems.com](http://www.SwiftSystems.com) and/or call toll free (877) Swift-si.
